The Styrofoam Cup Art of Cheeming Boey

By DAN GOULD

PSFK.com NYC – Inspiration to make things better | August 3, 2009

Over the past four years, Cheeming Boey has been carving out a unique artistic niche for himself. The California based illustrator creates crisp black and white drawings on basic Styrofoam cups. Following a chance cup-doodling session at a coffee shop (Boey had no paper) he discovered the challenges and benefits of the unusual medium. Using a permanent ink Sharpie Marker, he's developed his own style, which is influenced by pointillism and Japanese woodcuts.
